Objective

The 2nd Edition, "Textile & Leather Expo 2019" is one of the most eagerly awaited events related to textile and leather industry that gathers all professionals focused on the development of the sector in Albania and their individual and collective growth. This exhibition represents a meeting point for the largest and most significant Albanian and foreign producers. The event will address one of the most important challenges for the future of the sector, stimulating and enhancing dialogue between local, regional and international companies. Also, this event aims to encourage the companies' further development by focusing mainly on full cycle production, and ways of improving communication channels, lead generation, and effective marketing.

The 2nd Edition, "Textile & Leather Expo 2019" will showcase the latest trends for the upcoming seasons for garments, footwear, bags and accessories; it will encourage ways of improving competition through a diverse product offering in design, and by focusing on the latest innovative production techniques. Investing in technologies will make the companies more competitive in the international landscape, and it will contribute to move from CM (Cut-Make) or M (Make) towards more advanced business models.

Furthermore, this edition will serve as an excellent platform for promoting projects that involve young talent and students of fashion & design schools such as: designers, modelers, machineries, maintenance technicians, specialists etc., thus further promoting the needs of the sector for professional education and a specialized workforce.

Textile & Leather in Albania

Textile sector in Albania have been shaped by a long tradition and close relationships with Italian investors, experts and buyers over the last 20 years. Garment manufacturing sector employs more than 35,000 people and its average annual exports exceed 15,2% of Albania's total exports. Its main export markets are Italy, Germany, Greece and Spain. Albania represents a strategic location with easy access to a large marketplace, low costs and a competitive workforce. In the recent years a significant number of manufacturers have moved up the value chain to full cycle production and several entrepreneurs invested in new technologies, equipment and knowledge that allowed them to add more value to customers and move on to other roles in the design during the production process.

Together garment and footwear industry represent Albania's main exporter and this sector is resisting the competition from other countries. Referring the World Bank's regional report, in 2018, shoes were the most exported product. More than a hundred companies together produce over 1.2 million pairs of shoes in Albania every month.

Albania has over 20,000 shoe & leather workers and more than 12,000 students following vocational training courses in engineering ensuring a continuous supply of technically qualified workers. "Textile & Leather Expo" can serve as a "talent pool" for them
